The "Force" Food Company, Buffalo, N. Y.:
GENTLEMEN—A rumor having reached me that your product, "FORCE," contained injurious ingredients, i took the occasion to analyze it, in the interest of my own family and of some friends who are liberal users of it.

It may interest you to be a some friends. Boston, June 25, 1903,

It may interest you to know that I found it consisted exclusively of Whole Wheat, Barley and Salt, and is absolutely free from any injurious elements

Permit me to express my sincere regret that such serious and baseless rumor should gain footing with the public.

You are free to use this letter in any way that will help to do your product justice.

To Whom It May Concern:
At the invitation of The "FORCE" Food Company, of Buffalo, I have visited their Mills and made a careful examination of the materials from which, "FORCE" is prepared, and the processes which convert it into its finished condition.

I found that "FORCE" consists exclusively of what my previous analysis indicated, viz.: Whole Wheat and Barley, with a flavoring of Table Salt, flaked, cooked and sterflized by 300 degrees of heat.

A feature of the manufacture which impressed me considerably was the fact that the process is entirely mechanical, the food being prepared, cooked and boxed by machinery, without ever coming in contact with the hands or clothing of the mill operatives.

I was also gratified to note that an experienced Chemist daily supervised the entire output, and that each day's manufacture was also tested by an expert cook.

I examined, in detail, the various steps in the manufacture of your product, such as the steam cooking, the flaking and the roasting, as well as the packing, and find all to be remarkably clean and of absolute healthfulness. The final roasting is done at a temperature above 300° F., which, with the steam cooking, completely sterilizes the product, and the entire process, from the first step to the final sealing of the package, is a mechanical one, the product at no time coming in contact with the hands or clothing of the persons handling the machines or packages.
